Magento Extension
for Soft2print

Soft2Print provides a complete online administration backend solution for both web shops and suppliers. The backend enables the web shop owner to setup their own templates, art and inventory, as well as track their orders through to fulfillment. To produce a complete webshop solution, a seamless integration to an e-commerce platform is required. OnlineStart, based in Sydney Australia have completed several integrations of Soft2print with Magento, one of the most popular Open source ecommerce platforms used today. They offer a range of options from the supply of the integration code as an extension/module, to installation services or a **complete customized, integ**rated website solution.

See below for a brief overview of the options available from OnlineStart when requiring an interface between Soft2print and Magento.

Option 1

Extension Code Supplied

Supply extension code and instructions for clients own developer to install.

Option 2

Default Magento Install with Soft2print integration

Magento installed on server with soft2print integration completed, ready for customization. (Default Template used).

Option 3
